## ECLIPSE INSTALLATION

## JENKINS INSTALLATION

The screenshot shows the Jenkins web interface in a browser. The browser's address bar displays 'localhost:8064'. The Jenkins header includes the logo, a search bar with the text 'Search (CTRL+K)', and user information for 'admin' with a 'log out' link. The main content area is titled 'Welcome to Jenkins!' and includes a message: 'This page is where your Jenkins jobs will be displayed. To get started, you can set up distributed builds or start building a software project.' Below this, there are two main sections: 'Start building your software project' with a 'Create a job' button, and 'Set up a distributed build' with options to 'Set up an agent', 'Configure a cloud', and 'Learn more about distributed builds'. On the left sidebar, there are links for 'New Item', 'Build History', 'Manage Jenkins', and 'My Views'. Two status boxes are visible: 'Build Queue' showing 'No builds in the queue' and 'Build Executor Status' showing '1 Idle' and '2 Idle' executors. At the bottom right, there is a Windows activation notice and links for 'REST API' and 'Jenkins 2.452.3'.

## SONARQUBE INSTALLATION

sonarqube

Projects Issues Rules Quality Profiles Quality Gates Administration More

### How do you want to create your project?

Do you want to benefit from all of SonarQube's features (like repository import and Pull Request decoration)?  
Create your project from your favorite DevOps platform.  
First, you need to set up a DevOps platform configuration.

Import from Azure DevOps Setup

Import from Bitbucket Cloud Setup

Import from Bitbucket Server Setup

Import from GitHub Setup

Import from GitLab Setup

Are you just testing or have an advanced use-case? Create a local project.

Create a local project

Embedded database should be used for evaluation purposes only  
The embedded database will not scale, it will not support upgrading to newer versions of SonarQube, and there is no support for migrating your data out of it into a different database engine.

Activate Windows  
Go to Settings to activate Windows.

SonarQube™ technology is powered by [SonarSource SA](#)

## TOMCAT INSTALLATION

Home Documentation Configuration Examples Wiki Mailing Lists Find Help

### Apache Tomcat/9.0.91

If you're seeing this, you've successfully installed Tomcat. Congratulations!

Tomcat Versions

##### Managing Tomcat

For security, access to the `manager.webapp` is restricted. Users are defined in:

```
SCATALINA_HOME/conf/tomcat-users.xml
```

In Tomcat 9.0 access to the manager application is split between different users.
